

NEONATAL

# FERROUS SULFATE

This document should be read in conjunction with this [DISCLAIMER](#)

**Unrestricted:** Any prescriber may initiate treatment

<b>Presentation</b>	Oral Liquid: 150mg/5mL ferrous sulfate Equivalent to <b>6mg/mL of elemental iron</b>
<b>Classification</b>	Iron Supplement
<b>Indication</b>	<p><b>Infants born at less than 35 weeks gestation OR with birthweight less than 2500 grams AND who are predominantly fed unfortified breastmilk OR term infant formula</b></p> <ul style="list-style-type: none"> <li>• Prophylaxis for Anaemia of prematurity</li> <li>• Iron supplement in low birth weight infants with reduced body iron stores</li> </ul> <p><b>Please Note:</b> PreNan human milk fortifier contains iron; Infants fed breast milk fortified with PreNan human milk fortifier at 150-160 mL/kg/d and infants on preterm formula receive approximately 2.8 mg iron/kg/d and may not need further iron supplementation.</p> <p><i>Supplementation to start at <u>4 weeks of age</u> and cease at <u>6-12 months of age</u> depending on dietary intake of iron.</i></p>
<b>Contraindication</b>	Thalassaemia, haemochromatosis and anaemia not due to iron deficiency
<b>Precaution</b>	Risk of iron induced haemolysis in preterm infants with Vitamin E deficiency is greater in the first 6 weeks of life.
<b>Dose</b>	<div style="border: 2px solid red; padding: 5px; text-align: center;"> <p><b>Caution:</b></p> <p>May reduce therapeutic effect of Thyroxine. Separate dose administration times.</p> </div> <p><b>Prophylaxis</b></p> <p><b>Oral:</b> 0.25mL/kg per dose every 12 hours (3mg/kg/day)</p>

	<p><b><u>Increase in dose : based on Hb and serum ferritin</u></b></p> <p><i>(Increase only If the ferritin concentration is &lt;40 microgram/L)</i></p> <p><b>Oral:</b> 0.5mL/kg per dose every 12 hours (6mg/kg/day)</p>
<b>Monitoring</b>	<p>Haemoglobin, serum ferritin</p> <p>If the ferritin concentration is &gt;300 microgram/L, typically a result of multiple blood transfusions, iron supplements should be delayed</p>
<b>Guidelines &amp; Resources</b>	<p>KEMH Clinical Guideline: Neonatal: <a href="#">Vitamin and Mineral Supplementation</a></p> <p>WNHS Policy: Neonatal: <a href="#">Anaemia and Bleeding Disorders</a></p>
<b>Administration</b>	<p><b>Oral:</b> Preferably given prior to a feed, otherwise administer with feeds.</p>
<b>Adverse Reactions</b>	<p><b>Common:</b> nausea, GI irritation, constipation, black discolouration of faeces</p>
<b>Interactions</b>	<p>Vitamin E, calcium carbonate, levothyroxine, quinolone antibiotics (oral)</p>
<b>Storage</b>	<p>Store at room temperature, below 25°C</p>
<b>Notes</b>	<p>Contains 70% Sorbitol solution 100mg/mL</p> <p>Ferro –Liquid® Oral solution does not contain alcohol</p>
